

1,145 Tons. One desert. A disappearing road. No problem.

CUSTOMER CHALLENGE

Our Client was faced with transporting 372 pieces of oil and gas equipment, many of which were heavy and oversized from Italy to a drilling site in Uzbekistan through the Volga-Don canal and the port of Turkmenbashi. To avoid potential problems and ensure the job was completed on time, our customer required extensive planning and surveying of the proposed transit route.

OUR SOLUTION

- Complete route survey, clearance from all local authorities obtained in advance of move
- Route planning and permit applications
- Transportation management
- Documentation
- Escorts and convoy

CUSTOMER BENEFITS

The OIA Energy Team's intimate knowledge of the areas and countries along the project's transportation route proved invaluable and ensured that progress was maintained according to schedule. Several potential disasters were avoided thanks to the team's extraordinary attention to detail, diligence, and experience. The customer was pleased with OIA's quick reactions and solutions to unforeseen problems the route presented along the way.
