

SYSTEMS INTEGRATION

OIA Communications Interface made easy

Accurate information, timely communication and robust technology support is just as important as a well-designed logistics solution. OIA Global hosts a comprehensive suite of services scaled to enable our clients to simplify their supply chain management, reduce costs, and ensure accuracy. Whether it's on-line visibility to shipment status, a customized inventory in-transit report or EDI messaging, our goal is to deliver the information tied to your needs.

OIA Global supports the following EDI formats:

ANSI X12, EDIFACT, XML

OIA exchanges messages using the following protocols:

FTP, HTTPS, sFTP, VAN and AS2

The key questions for any EDI implementation project:

1. What is your time frame for integration? OIA's general project timeline is 60-90 days.
2. What EDI format?
3. Which connection protocol?
4. What messages sets and data points or information do you need?
5. Who in your technology group will be assigned to work with us, and where is this individual located?
6. What is your back office (ERP) System?

OIA Global supports the following standard EDI messages:

110, 210, 310, 810 - Invoice (Air, Motor, Ocean, Generic)	850 - Purchase Order
204 - Motor Carrier Shipment Information	856 - ASN (Advanced Shipment Notification) / Manifest
214 - Air Shipment Status Message	861 - Receiving Advice
300 - Ocean Booking Request (Reservation)	940 - Work Order
304 - Ocean Shipping Instructions	945 - Warehouse Shipping Advice
315 - Ocean Status Details	997 - Functional Acknowledgement
820 - Remittance Advice	

EDIFACT standard messages we use:

IFTSTA - Status Message	INVOIC - Invoice	DESADV - Dispatch Advice Message
IFTMIN - Instruction Message	ORDERS - Purchase Order
