

Energy

Supply chain solutions for complex and oversized cargo, with extensive planning and careful execution.

Industries: Automotive & Mobility | Electronics | Energy | Healthcare | Industrial | Retail & Lifestyle

We develop route plans, method statements, and risk assessments so that all potential scenarios are considered, and so that plans can remain adaptable during the shipment journey. Our teams work to overcome bridges, narrow roads, and countless other obstacles, always prioritizing the safety of all personnel, cargo, and equipment involved. OIA's operations personnel don't just overcome problems, they anticipate them!

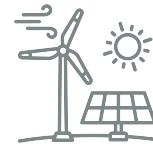

OIA's energy team regularly handles both in-gauge cargo, such as full container load (FCL) ocean/air freight, as well as out-of-gauge (OOG) cargo, via breakbulk shipping. We're ready to become your trusted supply chain partner wherever your business may operate.

- ✓ Oversized, abnormal & out-of-gauge (OOG) cargo
- ✓ Ro-Ro & breakbulk shipping
- ✓ Marine & route surveys
- ✓ Hazardous goods transport
- ✓ Air & ocean charters
- ✓ River barges
- ✓ Regular finalist at the Heavy Lift Awards
